

## IG-highlighted molecule

**\*\*Detected concepts:\*\***

- Haloarene (score 0.73)
- Primary aromatic amine (score 0.62)

**\*\*KB snippet:\*\***

Haloarenes are associated with AhR activation and oxidative stress.

**\*\*Generated rationale:\*\***

The molecule contains a haloarene motif with extended lipophilic side chains, consistent with SR--ARE and SR--p53 risk.
